5. Testing

Test voltages

Over voltage test (Always in a CSA project)
Special (separate instruction)

6. Special notes:

Wires between plates are H07V-K if voltage is over 400V.
Profinet cables are pulled separate from motor cables.

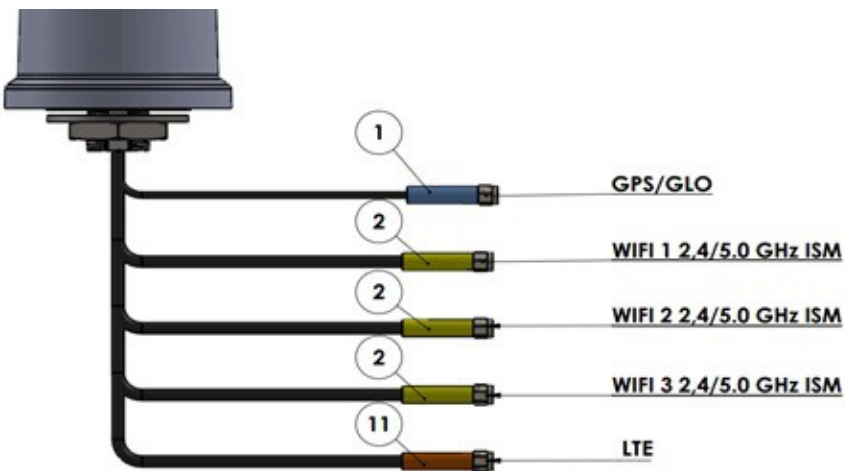

Wire Marking : Wire markers on all wires
Cables numbers and ethernet ports must be marked.

All bolts, nuts and screws outside devices/cubicles must be stainless steel.

Internal cables are marked with Phoenix contact yellow cable markers.
Type: 52899553-WIRE MARKER UC-WMTBA (24x5) YE.

Trolley 5-in-1 multiantenna connections are shown below.
